

IMPLEMENTATION

Empower your team with the best cloud solutions.

THE SPARKWISE METHODOLOGY

- 1 ANALYZE**

Using different analysis workshops, Sparkwise determines the best solution suited to your needs and organizational goals. This phase allows you to assimilate your requirements and plan the implementation project.
- 2 DESIGN**

Following the analysis, the objective of the design phase is to design a personalized solution for each of the requirements by following the *SCRUM Agile* methodology.
- 3 BUILD**

At this point, Sparkwise configures and customizes the recommended software. In addition, we ensure the migration of your data and prepare training materials for end users according to their respective roles.
- 4 VALIDATE & TESTING**

Afterwards, Sparkwise ensures that all of your requirements are configured, validated by you and tested for deployment.
- 5 DEPLOYMENT**

Finally, we deploy to production when modifications, training, data migration and configurations are completed. In addition, Sparkwise takes care of change management with your teams and software support.
